

# Who's your cat?

Cats come in all shapes and sizes. Some convince you to let them outside to explore, while others are happy curled on top of the couch. Different lifestyles pose different health risks and present different health needs and treatments.

Ask us how your cat's lifestyle impacts their health at your next appointment.

## THE SUNSEEKER

- Ruler of the palace, a Sunseeker has no need for the dirty outdoors
- Lounging in a beam of sunlight or a massage on the couch is Sunseeker heaven
- When the Sunseeker stretches across the couch, or your lap, his not so secret language is asking for a belly rub

## THE GREETER

- Your Greeter likes socializing with friends, family and neighbours, both inside and out
- Happy on the couch, patio lounger or front step, the Greeter wants to meet the world
- Greeters are up for pretty much anything, as long as she's near you and her food

## THE EXPLORER

- An Explorer likes to roam and visit new places, with or without you
- Parental supervision gets in the way of risking all nine lives
- Hunting connects her with her wild feline roots, and she's always leaving you "gifts"

So, which one is your cat?
